

mediastar-SG®

Public, Educational and Government (PEG) Community Information Channels

- Create broadcast-quality local content using text, photos and graphic templates for quick updates.
- Add MPEGs to the channel quickly and easily.
- Air community meetings, local shows and live feeds on your channel using the built-in ProMX video insertion and Master Control system.
- Automate content production through your Website.
- The mediastar-SG playback system automatically manages content 24 hours a day. Update in real-time, with no downtime. Schedule years in advance.
